

Remove recently opened projects from the CodeGear RAD Studio IDE welcome page

Here is a procedure I wrote for clearing the recently opened projects from the Welcome Page (via Windows registry) in CodeGear Rad Studio 2007.

```
procedure ClearRecentlyOpenedProjects;
var
    iCount    : Integer;
    Reg       : TRegistry;
    sList     : TStringList;
begin
    sList := TStringList.Create;
    Reg   := TRegistry.Create;
    try
        Reg.RootKey := HKEY_CURRENT_USER;
        if Reg.OpenKey('\Software\Borland\BDS\5.0\Closed Projects', True) then
            Reg.GetValueNames(sList);
        if sList.Count > 0 then
            begin
                for iCount := 0 to Pred(sList.Count) do
                    Reg.DeleteValue(sList[iCount]);
            end
        else
            MessageDlg('No registry items to be cleaned at this time.',
                mtInformation, [mbOk], 0);
        finally
            sList.Free;
            Reg.Free;
        end;
    end;
```

Note

You should be able to change this code to work with other versions of RAD Studio by changing the version number the registry key in the above code For example changing 5.0 to 4.0 should work with Delphi 2006.
