

How to create a borderless TComboBox

QUESTION

Is it possible to create a flat or borderless combo box? If so, how would I go about it?

```
{ ... }
TNoBorderComboBox = class(TComboBox)
protected
  procedure WMPaint(var Msg: TMessage); message WM_PAINT;
end;

procedure TNoBorderComboBox.WMPaint(var Msg: TMessage);
var
  C: TControlCanvas;
  R: TRect;
begin
  inherited;
  C := TControlCanvas.Create;
  try
    C.Control := Self;
    with C do
      begin
        Brush.Color := clBtnFace;
        R := ClientRect;
        FrameRect(R);
        InflateRect(R, - 1, - 1);
        FrameRect(R);
      end;
    finally
      C.Free;
    end;
  end;
end;
```
