

Force a TEdit to accept only numeric input

I've seen *the tip* to make a *TEdit* accept only numbers but there is an easier way to do it. This is the function I use in my applications:

```
procedure SetEditNumeric(Handle: THandle);  
begin  
    SetWindowLong(Handle, GWL_STYLE,  
        GetWindowLong(Handle, GWL_STYLE) or ES_NUMBER);  
end;
```
